

MINI PROJECT

Aim:

Write a code in JAVA for a simple Word Count application that counts the number of occurrences of each word in a given input set using the Hadoop Map-Reduce framework on local-stand alone set-up.

Solution :

Step 1: Open Eclipse >File>New> Java Project > (Give Name it - MR Programs Demo) > Finish

Step 2: Right Click>New>Package (Give Name it-Package n05)>Finish

Step 3: Right Click on Package > New > Class(Give Name it - Word Count)

Step 4: Add Following Reference Libraries

Right Click on Project>Build Path>Add External Archivalst

/usr/lib/hadoop-0.20/hadoop-core.jar

Usr/lib/hadoop-0.20/lib/Commons-cli-1.2.jar

Step 5: Type following Program

```
packagePackage Demo5;

importjava.io.IOException;

importorg.apache.hadoop.conf.Configuration; importorg.apache.hadoop.fs.Path;

importorg.apache.hadoop.io.Int overline W ritabl

importorg.apache.hadoop.io.Long Writable;

importorg.apache.hadoop.io.Text;

importorg.apache.hadoop.mapreduceJob;

importorg.apache.hadoop-mapreduce Mapper;

importorg.apache.hadoop.mapreduce.Reducer;

importorg.apache.hadoop.mapreduce.lib.input.FileInput Format;

importorg.apache.hadoop.mapreduce.lib.output.FileOutput Format:

importorg.apache.hadoop.util.Generic OptionsParser; publicclass WordCount(

publicstaticvoidmain(String[]args) throws Exception

{

Configurationc=newConfiguration();

String files = newGenericOptionsParser(c,args).getRemainingArgs();

Pathinput = newPath(files[0]);

Pathoutput = newPath(files[1]);

Jobj=newJob(c,"wordcount");
```

```

J.setJarByClass(WordCount.class);
j.setMapperClass(MapForWordCount.class);
j.setReducerClass(ReduceForWordCount.class);
j.setOutputKeyClass(Text.class);
j.setOutputValueClass(IntWritable.class);
FileInputFormat.addInputPath(j,input);
FileOutputFormat.setOutputPath(j,output);
System.exit(j.waitForCompletion(true)?0:1);
}

public static class MapForWordCount extends Mapper<LongWritable,Text,Text,IntWritable>{
    public void map(LongWritable key, Text value, Context con) throws IOException, InterruptedException
    {
        String line = value.toString();
        String[] words = line.split(" ");
        for (String word : words)
        {
            Text outputKey = new Text(word.toUpperCase().trim());
            IntWritable outputValue = new IntWritable(1);
            con.write(outputKey,outputValue);
        }
    }
}

public static class ReduceForWordCount extends Reducer<Text,IntWritable,Text,IntWritable>
{
    public void reduce(Text word, Iterable<IntWritable> values, Context con) throws IOException, InterruptedException
    {
        int sum = 0;
        for (IntWritable value : values)
        {
            sum += value.get();
        }
        con.write(word,new IntWritable(sum));
    }
}

```

}

Explanation:

- The program consists of 3 classes:
- Driver class (Public void static main-the entry point)
- Map class which extends public class Mapper <KEYIN, VALUEIN, KEYOUT, VALUEOUT> and implements the Map function. Reduce class which extends public class Reducer <KEYIN, VALUEIN, KEYOUT, VALUEOUT> and implements the
- Reduce class with extend public class reducer < KEYIN ,VALUEIN ,KEYOUT, VALUEOUT > and implements the Reduce function.

Step 6: Make JarFile

- Right Click on Project > Export > Select export destination as JarFile> next> Finish

Step 7: get at extfile and shift it in HDFS

- To Move this file into Hadoop directly, open the terminal and enter the following commands:

```
[training@localhost-Shadoopfs-putwordcountFilewordCountFile]
```

Step 8: Execute Jarfile

```
(hadoopjarjarfilename.jarpackageName.ClassNamePathToInputTextFilePathToOutput Directry)
```

```
[training@localhost-Shadoopjar MRPrograms Demo jur Package Demo, Word
```

```
CountwordCountFileMRDir]
```

Step 9: OpenResult

```
[training@localhost-$hadoopfs-lsMRDir]
```

```
Found3items
```

```
-rw-r-r-trainingsupergroup02018-05-2003:36/user/training/MRDir/_SUCCESS
```

```
drwxr-xr-x-trainingsupergroup02018-05-2003:36/user/training/MRDir/_logs
```

```
-rw-r--l-trainingsupergroup202018-05-2003:36/user/training/MRDir/part-r-00000
```

```
[training@localhost-Shadoopfs-catMRDir/part-1-00000
```
